1. SuperUser under the ‘User’ column is the System
2. Under ‘Client’ column you will see where the employee is clocking in and out from
3. ‘Client’ column displays machine IP: then phone number
4. Data Source will show how the employee clocked in:
   a. TeleTime IP = phone
   b. Mobile Device = mobile app
   c. Time Stamp = PC Browser
5. If the timekeeper makes an edit you will see their username under the ‘User’ column

- **NETID of user. Shows SuperUser if it is registered by System**
