Come! Explore, Invent and Experiment at STEMosphere

March 8, 2014
The George Washington University - Washington D.C.

STEMosphere

Come Experience the first D.C. STEMosphere

STEMosphere is a FREE event open to all learners: kids through octogenarians, educators and administrators, families and communities, any person who wants to explore, invent, and experiment.

Presented as the public portion of Share Fair, STEMosphere is a highly interactive expo of hands-on, minds-on adventures that highlights the innovation and creativity in the D.C. community. Hosted by GW's Graduate School of Education and Human Development.

Register Here

2014 D.C. hands-on adventures include:

- Learn about anatomy by layering clay on realistic models
- Experiment with the world's first touch Interactive Projector
- Explore cyber security programs
- Get your hands dirty with an environmental service-learning project

...And more!

All participants must REGISTER in advance; space is limited.
Be a part of the first D.C. STEMosphere!
